

A map of the United States with state boundaries outlined. States where the species is found are shaded in light gray. These include Washington, Oregon, California, Nevada, Idaho, Utah, Arizona, New Mexico, Texas, Oklahoma, Kansas, Nebraska, South Dakota, North Dakota, Minnesota, Iowa, Missouri, Arkansas, Louisiana, Mississippi, Alabama, Georgia, South Carolina, North Carolina, Virginia, West Virginia, Maryland, Delaware, Pennsylvania, New Jersey, New York, Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire, and Maine. Numerous black dots are plotted on the map, representing individual records. There is a high density of dots in the Northeast (New York, Pennsylvania, New Jersey, New England) and the Midwest (Illinois, Indiana, Michigan, Wisconsin, Ohio). Other dots are scattered across the West (California, Oregon, Washington, Idaho, Utah, Arizona, New Mexico) and the South (Texas, Oklahoma, Arkansas, Louisiana, Mississippi, Alabama, Georgia, South Carolina, North Carolina, Virginia, West Virginia, Maryland, Delaware).
